TABLE

Leggenda intramontabile del design dell'illuminazione, Snoopy è stata concepita da Achille e Pier Giacomo Castiglioni nel 1967, perfetta incarnazione del senso dell'umorismo dei due fratelli in un gesto di design funzionale. Con una silhouette che ricorda l'omonimo cane dei fumetti, il design della lampada è rimasto invariato, con la base in marmo inclinata che sostiene un paralume in metallo smaltato tenuto in perfetto equilibrio.

An enduring legend of lighting design, Snoopy was conceived by Achille and Pier Giacomo Castiglioni in 1967, the perfect embodiment of a tendency to infuse functional design with a sense of humour. With a silhouette resembling its namesake comic strip dog, the lamp's design has remained unchanged, its slanted marble base supporting an enamelled metal shade held in perfect equilibrium.

L'originale Snoopy con il paralume nero si è evoluta in una collezione con le versioni verde e arancione, a cui è stata aggiunta la versione con diffusore navy-blue, che si ispira ad una tonalità utilizzata da Achille e Pier Giacomo per la loro lampada Sciuko prodotta da Flos nel 1966.

The Snoopy original with the black shade grew into a collection featuring green and orange versions. The latest addition, with a navy-blue shade, was inspired by a hue used by Achille and Pier Giacomo on their Sciuko lamp for Flos in 1966.

EMI TABLE

Emi Table by Erwan Bouroullec, 2024

Il percorso del lavoro di Erwan Bouroullec, sia come membro dello Studio Bouroullec che, più recentemente, come designer indipendente, ha sempre affiancato all'approccio estetico distintivo il fascino della meccanica industriale della creatività. EMI è il suo primo progetto illuminotecnico realizzato in autonomia per Flos e si ispira al concetto paradossale di "luce dall'ombra".

The trajectory of Erwan Bouroullec's work, both as part of Bouroullec Studio and more recently as a solitary creative, has always combined a distinctive aesthetic approach with a fascination for the industrial mechanics of creativity. His first solo lighting design for Flos, EMI, follows the paradoxical concept of 'light from shadow'.

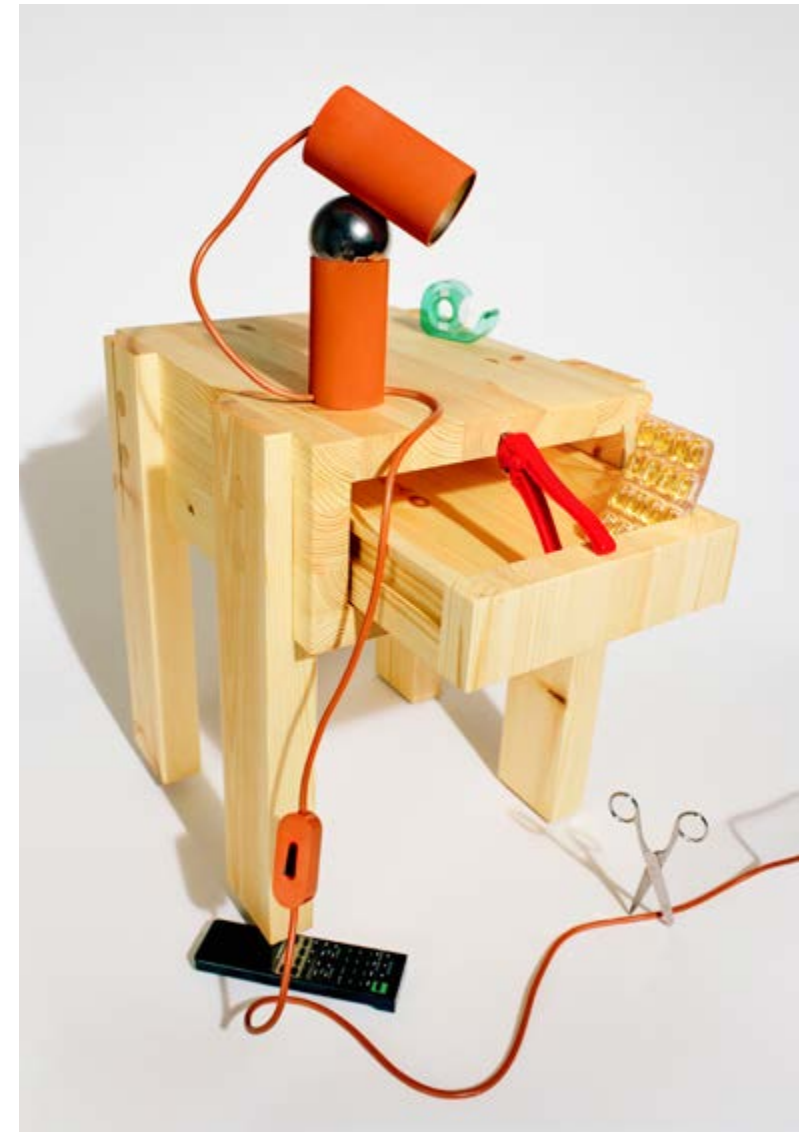

EMI è una collezione che fonde tecnologia e design: elementi luminosi racchiusi in un palo triangolare, la cui luce potente ma delicata è emessa da un corpo che rimane quasi invisibile.

A collection that blends technology and design, EMI features a trio of light modules encased within a triangular pole, its powerful but gentle lighting emitted from a body that remains nearly invisible.

C ramique di Ronan Bouroullec, il debutto di Flos nel settore della ceramica,   un trio di lampade scultoree che fondono l'approccio sensibile del designer francese verso i volumi e alle silhouette con la spinta dell'azienda verso l'innovazione.

Flos' debut in ceramics, Ronan Bouroullec's Ceramique is a trio of sculptural lights that merge the French designer's sensible approach to volumes and silhouettes with the company's push towards innovation.

Negli ultimi anni la ceramica   stata al centro del percorso creativo del designer, che si   avventurato in un'esplorazione personale del design astratto. Utilizzando la ceramica come mezzo pittorico, il materiale   diventato il soggetto di una serie di bassorilievi e vasi che sono tanto composizioni espressive quanto recipienti funzionali.

Ceramics have been a key focus of the designer's creative journey over the past few years, as his personal design explorations have ventured into the abstract. Using ceramic as a pictorial medium, the material has become the subject of a series of bas-reliefs and vases that are as much expressive compositions as they are functional vessels.

A testimonianza della novità del suo materiale già dal nome, Ceramique è una collezione completamente realizzata a mano con una finitura cristallina laccata senza piombo. I colori della collezione, Moss Green, Navy Blue e Rust Red, esaltano le superfici lisce, riflettendo la ricchezza del materiale.

Testifying the novelty of its material from its name, Ceramique is an entirely handcrafted collection made of a lead-free crystalline lacquered finish. The collection's colours, Moss Green, Navy Blue and Rust Red, enhance the smooth surfaces, reflecting the material's richness.

CHIARA

Mario Bellini, 2020

Nel 1969, l'architetto italiano Mario Bellini ha presentato per la prima volta Chiara, una lampada da terra realizzata da un unico "foglio" piatto ripiegato su se stesso, come un lucido mantello di acciaio inossidabile. Cinquant'anni dopo il suo lancio, Flos riedita questo prodotto iconico in svariate dimensioni.

In 1969, Italian architect Mario Bellini debuted Chiara, a flat-packable floor lamp for Flos that wore a shiny cloak of stainless steel. Fifty years after its introduction, Flos is reissuing the icon in a range of sizes.

3H CHARGING TIME

6-24H BATTERY LIFE

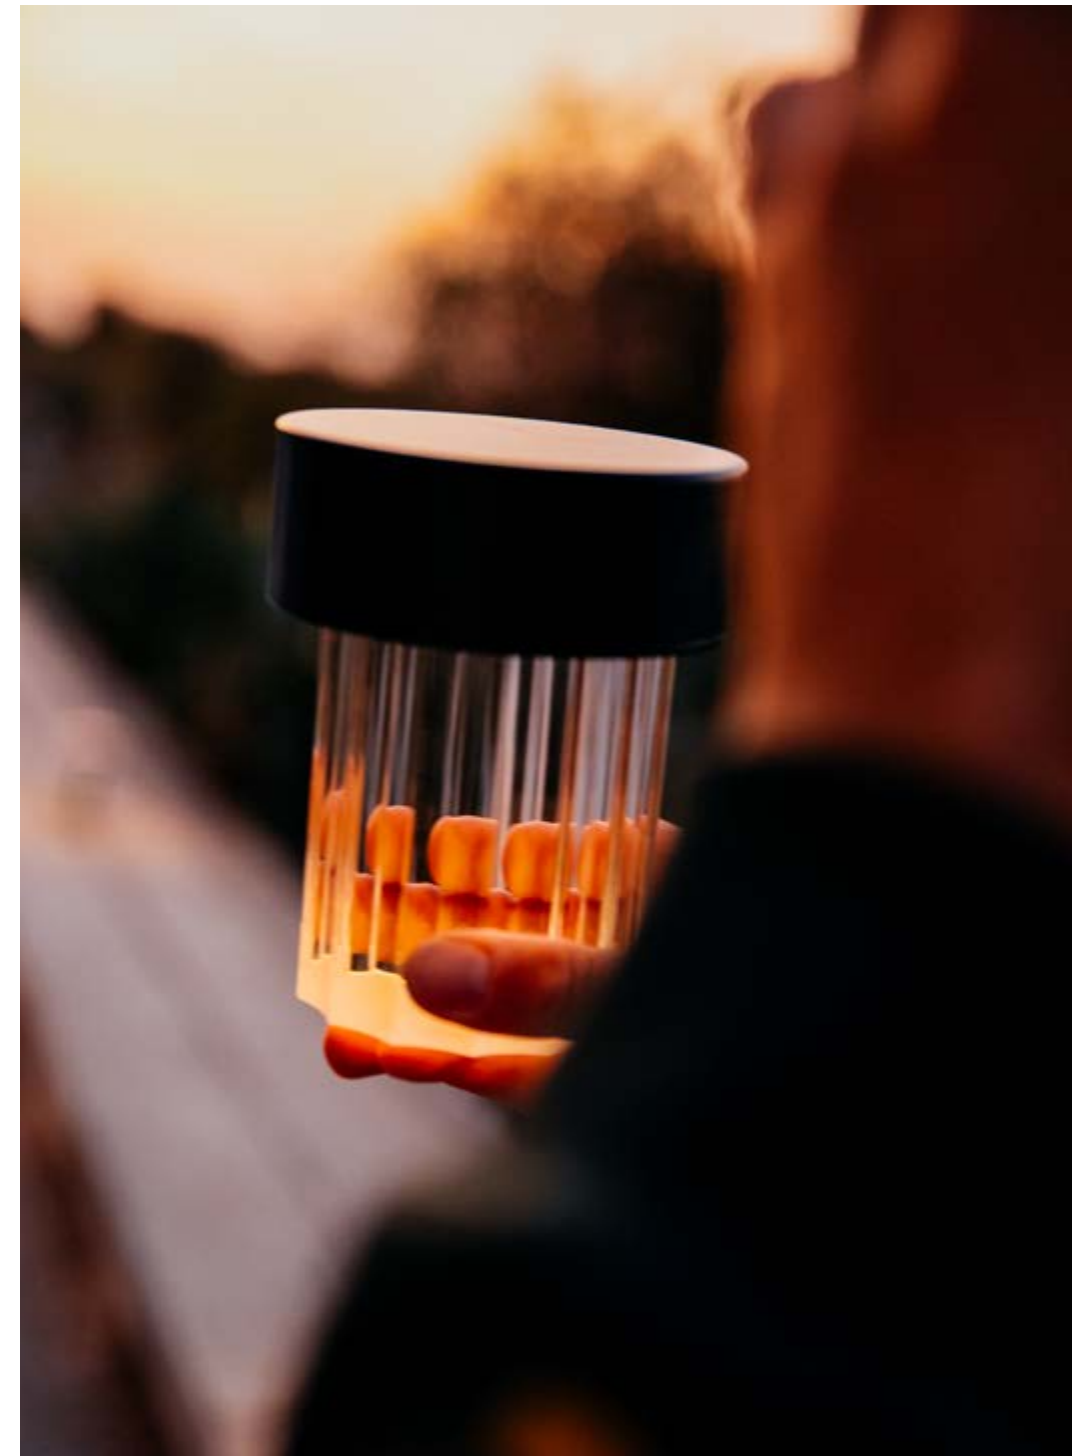

Il tempo necessario per caricare completamente il dispositivo è di 3 ore (500 cicli di carica garantiti). Con il dispositivo acceso a un'intensità del 100%, l'autonomia senza fili è di 6 ore (si possono superare le 24 ore di autonomia riducendo l'intensità). Dopo 6 ore, l'intensità diminuisce automaticamente del 20% e la necessità di ricarica viene indicata con un LED (L) che lampeggia ad alta frequenza (ogni 0,2 secondi) fino a che non si collega il dispositivo a una presa elettrica o fino al completo esaurimento della batteria.

The time required to completely charge the device is 3 hours (500 charging cycles guaranteed). With the device turned on at 100% intensity, the cordless autonomy is 6 hours (more than 24 hours of autonomy can be achieved by reducing the intensity). After 6 hours, the intensity automatically decreases to 20% and the need to recharge is indicated: the LED indicator (L) blinks at high-frequency (every 0.2 seconds) until the device is plugged in to charge or the battery is completely discharged.

Le finiture verde opaco e acciaio lucido possono essere utilizzate anche in ambienti esterni.

Matt green and polished inox finishes can also be used in outdoor locations.

I fratelli Achille e Pier Giacomo Castiglioni avevano ideato l'iconico riflettore a coppa in materia plastica trasparente. L'idea fu abbandonata per le deformazioni generate su di esso dal calore della sorgente luminosa a incandescenza. Il prototipo fu quindi sviluppato e prodotto da Flos nel 1962 con la celebre ed imponente coppa in vetro soffiato. Taccia matte white è l'ultima interpretazione di questo classico contemporaneo: la versione monocromatica e opaca della lampada ne esalta la silhouette e rende onore alla pura espressione della sua funzionalità.

In the Castiglioni brothers' original design, the iconic bowl reflector was made of transparent plastic. This idea was discarded though because the heat emitted by the incandescent light source deformed the plastic material. The prototype was then developed and produced by Flos in 1962, with its famous big blown glass bowl. Taccia white is the latest interpretation of this contemporary classic: The monochromatic, matte version of the lamp enhances its silhouette and honours the pure expression of its functionality.

Seki-Han F by Tobia Scarpa, 2025

Disegnata nel 1963, Seki-Han esprime la complessa e raffinata poetica progettuale di Scarpa. Composta da due scultoree pale in legno che racchiudono una sorgente luminosa tubolare, nella sua costruzione trae ispirazione dall'architettura navale e dalla profonda conoscenza del legno da parte del designer.

First designed in 1963, Seki-Han is a masterpiece that reflects Scarpa's refined sensibility. Formed by two sculptural wooden blades enclosing a tubular light source, its intricate construction draws on naval architecture and Scarpa's deep knowledge of woodworking.

Skynest Motion 2023

Nella versione Motion, Skynest sembra fluttuare nell'aria in un equilibrio elegante, sostenuta da uno stelo in tinta con i colori dei paralumi. Lo stelo, agganciato al soffitto e teso verso il pavimento con un contrappeso, è quasi invisibile per via del suo spessore ridotto al minimo.

In the Motion version, Skynest seems to float in the air in an elegant balance, supported by a stem matching the colors of the lampshades. The stem, hooked to the ceiling and stretched towards the floor with a counterweight, is almost invisible due to its thickness reduced to the minimum.

CHIARA

Mario Bellini, 1969/2020

“Un giorno ero nel mio studio e mi è venuto in mente che si sarebbe potuto utilizzare la luce nel modo in cui si manifesta nel nostro ambiente e nel nostro paesaggio, mai diretta, ma spesso attraversata dalle nubi o riflessa dagli oggetti, dai muri e dalle superfici. Quindi anziché dire “disegniamo una lampada” mi sono detto “disegniamo un apparato che sia in grado di prendere la luce da una sorgente artificiale e rifletterla nell’ambiente con una certa intelligenza e grazia”... Ho preso una forbice, un grande foglio di cartoncino e ho iniziato a tagliare qualche cosa che potesse diventare un cilindro con alla sommità un cappello più largo che, ricongiunto sul lato destro e sinistro, avrebbe potuto servire da riflettore della sorgente di luce ospitata nella base.”
– Mario Bellini

“One day in my studio it came to me that we could use light the way it manifests in our surroundings and our landscapes—never directly, but often through clouds or reflected off objects, walls, and surfaces. And so, instead of saying ‘let’s design a lamp’, I said, ‘let’s design an apparatus that can take light from an artificial source and send it back into our surroundings with a certain intelligence and grace’... I took some scissors, a big piece of card, and I started to cut out something that could be made into a cylinder with a wide hat on top that, when joined on the right and left-hand side, would act as a reflector of the light source housed in the base.”
– Mario Bellini

The carefully calibrated LED technology which powers the lamps is discretely integrated into the junctions between the glass modules. Almost absent, but ready to be activated at any (night-)time.

La superficie luminosa, perfettamente omogenea e d'ispirazione "lunare", è frutto della rivoluzionaria tecnologia Edge Lighting, che unisce massime performance, efficienza e comfort visivo. Il prodotto include la funzione Dim-to-Warm: scendendo di intensità, la luce passa da un tonalità di bianco più fredda ad uno spettro più caldo, come nelle affezionate lampade a filamento.

The light surface, perfectly homogeneous and "moon-inspired", is the result of the revolutionary Edge Lighting technology, which combines maximum performance, efficiency and visual comfort. The product includes the Dim-to-Warm function: as the intensity decreases the light goes from a colder blue tone to a warmer spectrum, like in the well-loved filament lamps.

Nello stelo è incluso il sensore Soft Touch che reinventa l'interazione con il prodotto. Esso garantisce un controllo fluido e preciso del flusso luminoso con un semplice e naturale tocco della mano.

LUMINATOR

Achille & Pier Giacomo Castiglioni, 1954

Un classico degli anni '50, Luminator di Achille e Pier Giacomo Castiglioni ritorna in cinque brillanti colori che ne esaltano le forme essenziali. Una lampada che è un esercizio di minimalismo funzionale e il cui colore originale antracite viene arricchito da una nuova paletta pop di bianco, rosso, giallo e lite blue. In questo album fotografico, il fotografo Alecio Ferrari e i set designer Studio Testo hanno sperimentato i nuovi colori e le forme essenziali di Luminator.

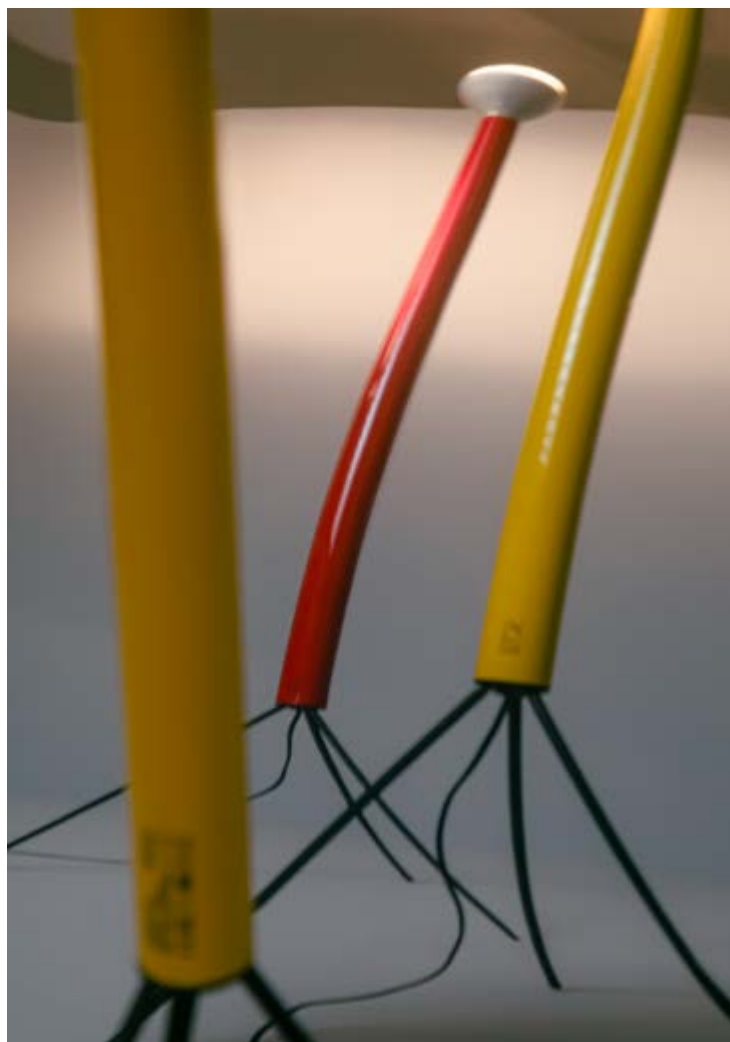

A 1950s classic, Achille and Pier Giacomo Castiglioni's Luminator returns in five bright colours that enhance its essential shapes. A lamp that is an exercise in functional minimalism, the original anthracite colourway is enriched with a new, pop palette of white, red, yellow and lite blue. In this photographic portfolio, photographer Alecio Ferrari and set designers Studio Testo experimented with Luminator's new colours and its essential forms.

Lampada da terra a luce indiretta, Luminator è composta da un treppiede scomponibile e da un tubo, largo appena quanto basta per contenere il portalamпада.

Floor lamp providing indirect light, Luminator is made of a decomposable tripod and a tube, just wide enough to contain the bulb socket.

«At rest, however, in the middle of everything

place this lamp in another or better position than that from
which it can light up the whole thing at the same time?»

Seki-Han S by Tobia Scarpa, 2025

Progettata da Tobia Scarpa nel 1963 e rilanciata nel 2025, Seki-Han è una testimonianza della sua maestria nel design e nella lavorazione del legno. L'intricata costruzione si ispira a tecniche navali per dare forma a due pale in legno che ora ruotano attorno alla sorgente luminosa, lasciando sempre visibile un filo di luce per un effetto molto poetico.

Designed by Tobia Scarpa in 1963 and reissued in 2025, Seki-Han is testament to his mastery of design and wood-working expertise. The intricate construction draws on naval techniques to shape two wooden blades that now rotate around the light source, leaving a slender sliver of light visible at all times for a highly poetic effect.

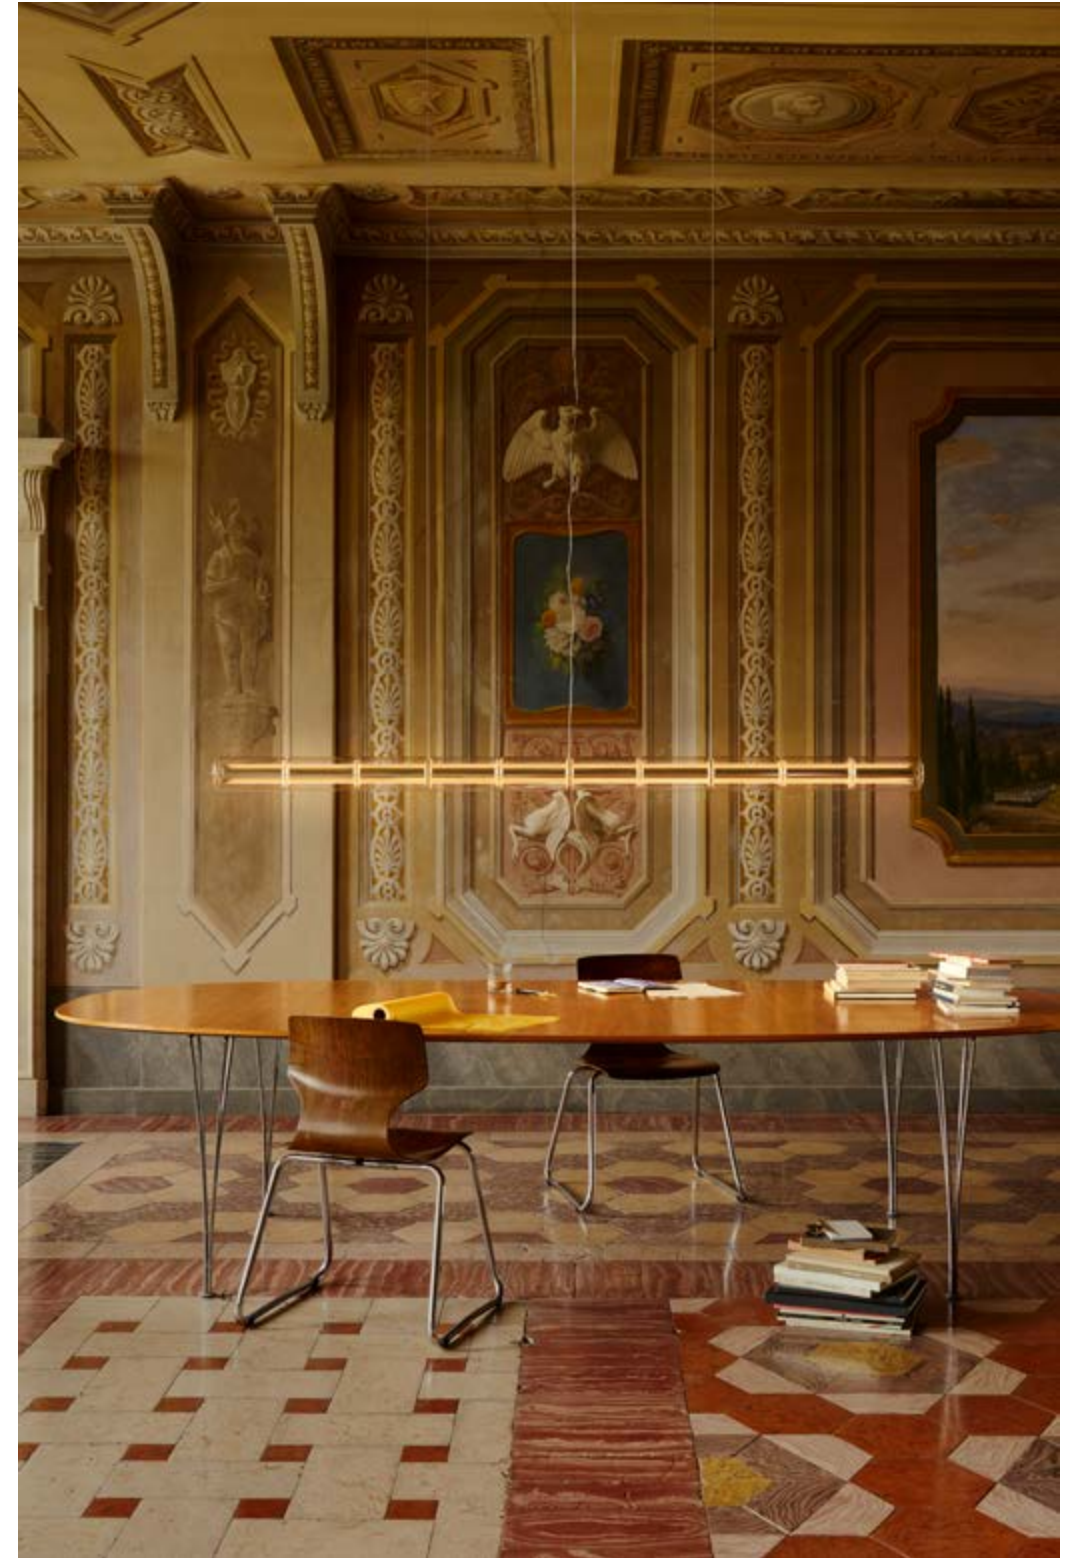

La riedizione presenta anche un elegante modello a sospensione, identico nel design ma con un corpo leggermente più corto. In entrambe le versioni, Seki-Han è una presenza vivente in cui l'immaterialità della luce incontra la tattilità del legno.

The re-edition also introduces an elegant suspension model, identical in design but with a slightly shorter body. In both versions, Seki-Han is a living presence where the immateriality of light meets the tactility of wood.

My Circuit offre un approccio funzionale all'illuminazione decorativa. Il rivoluzionario binario flessibile di Michael Anastassiades offre un nuovo approccio all'illuminazione dello spazio, fungendo da strumento architettonico che offre sia una combinazione di illuminazione ambientale diffusa che una sofisticata illuminazione d'accento. Non c'è limite a ciò che My Circuit può realizzare, grazie all'approccio giocoso alla modularità del suo binario e alla ricca gamma di apparecchi di illuminazione che possono esaltarne la presenza o farlo diventare uno strumento funzionale e discreto.

My Circuit offers a functional approach to decorative lighting. Michael Anastassiades' revolutionary flexible track offers a new approach to illuminating a space, serving as an architectural tool that offers a combination of diffused ambient lighting and sophisticated accent lighting. There is seemingly no end to what My Circuit can achieve, thanks to the playful approach to modularity of its track and its rich portfolio of lighting objects that can enhance its presence or leave it as a functional, discreet tool.

LUCE ORIZZONTALE

Luce Orizzontale by Ronan & Erwan Bouroullec, 2022

Ronan & Erwan Bouroullec, 2022

Nata da un ambizioso progetto di Flos Bespoke, il design di Luce Orizzontale è la sintesi della complessità artigianale del concetto: una struttura modulare a incastro composta da elementi tubolari di vetro spesso, sospesi in modo minimale dal soffitto.

Originating from an ambitious Flos Bespoke project, the design of Luce Orizzontale distills the concept's artisanal complexity: an interlocking, modular structure composed of tubular elements of thick glass, minimally suspended from the ceiling.

La configurazione modulare della lampada prevede 8, 10 o 12 tubi di vetro fuso (le dimensioni variano da un metro e mezzo a due metri e mezzo) e strutture di sospensione di diverse lunghezze. I cilindri di vetro sono sostenuti da una barra di alluminio lucidato, mentre le sorgenti luminose, due strisce di LED che dirigono la luce verso l'alto e verso il basso, sono inserite nella barra e possono essere dimmerate attraverso un sistema situato a un'estremità della barra stessa.

The lamp's modular configuration includes 8, 10 or 12 cast glass tubes (its size ranging from one and a half metres to two and a half metres), and hanging structures of different lengths. The glass cylinders are supported by a polished aluminium bar, while the light sources, two LED strips pushing the light upwards and downwards, are inserted in the bar, and can be dimmed through a system located at one end of the bar.

Il linguaggio irriverente e poetico di Marcel Wanders Studio trova una nuova espressione in Skynest, l'ultimo progetto di illuminazione per Flos. Un'unione di eleganza formale e innovazione tecnica, Skynest presenta un'innovativa striscia LED, intrecciata con un elemento tubolare in tessuto per creare una forma a cesto che è artigianale quanto sofisticata.

Marcel Wanders Studio's irreverent and poetic design language finds a new expression in Skynest, its latest lighting design for Flos. A combination of formal elegance and technical innovation, Skynest features an innovative LED strip, woven with a textile tube to create a basket-like form that is crafted yet sophisticated.

SKYNEST

Marcel Wanders, 2022

Seguendo l'approccio decorativo di Skygarden (un progetto che lo studio ha completato per Flos nel 2007, una cupola con al suo interno un decoro floreale a rilievo), Skynest porta il lavoro Marcel Wanders Studio verso nuovi orizzonti, arricchendo il suo approccio umanistico e poetico con un nuovo modo di fare innovazione, sostenibilità e tecnologia.

Il Direttore Creativo dello studio, Gabriele Chiave, parla della duplice natura di Skynest e dell'esperienza di progettare con la luce.

Following on from the decorative approach of Skygarden (a 2007 design by the studio concealing a relief of flowers within a domed lamp), Skynest takes Marcel Wanders Studio in a new direction, enriching its humanistic, poetic approach with a new world of innovation, sustainability and technology. The studio's Creative Director, Gabriele Chiave, talks about the dual nature of Skynest and the experience of designing with light.

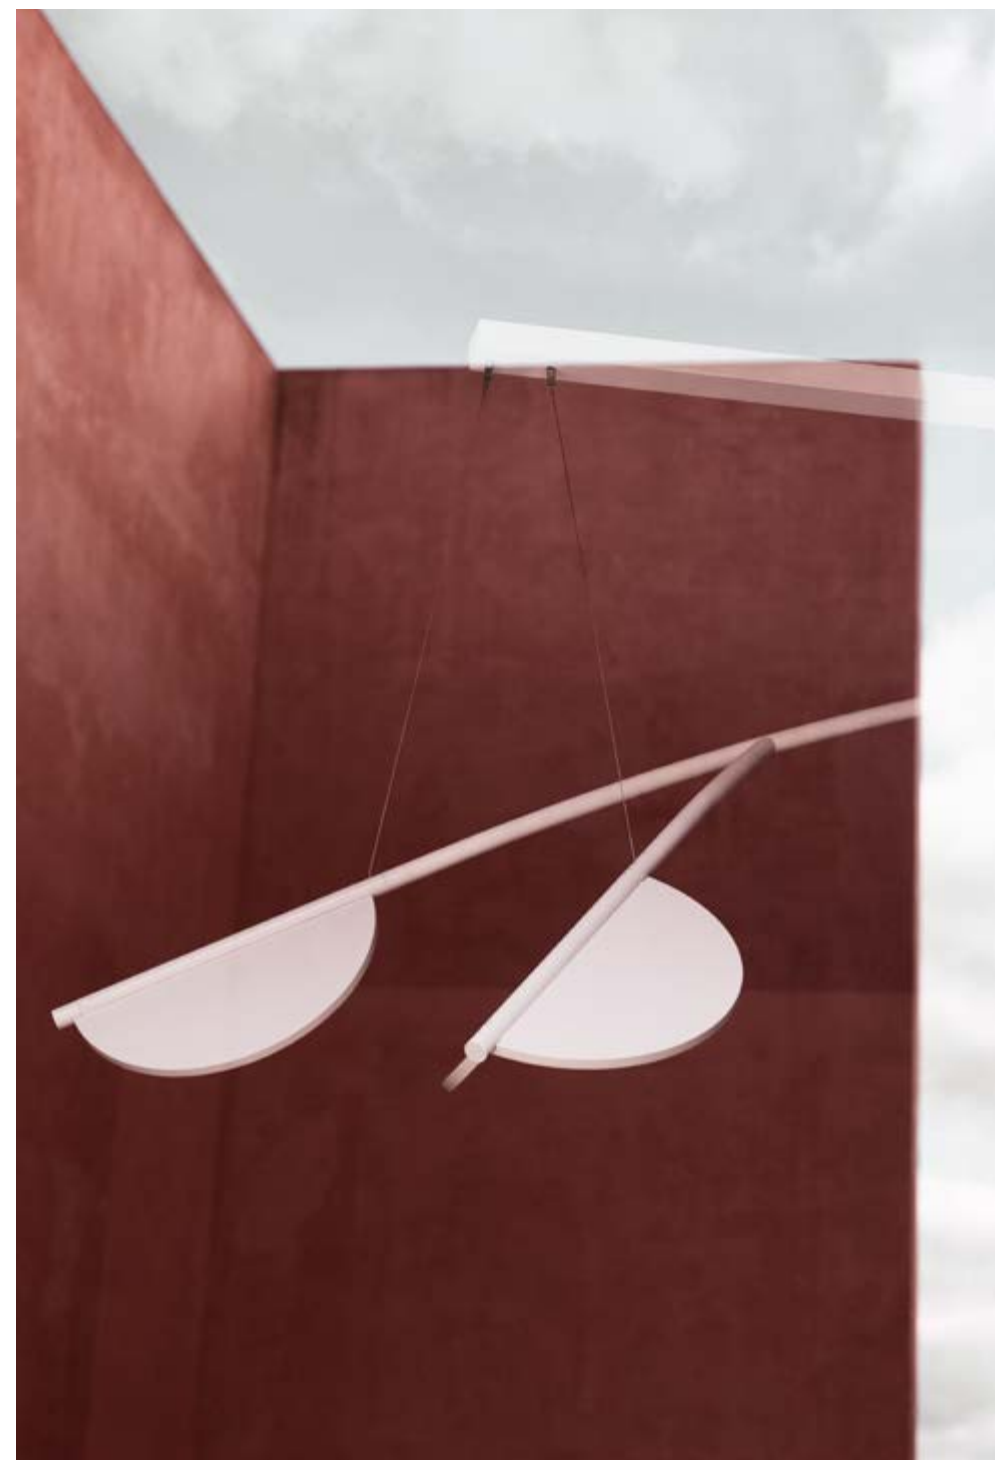

L'ispirazione da cui nasce Almendra si legge subito dalla sua silhouette, un connubio perfetto tra il rigore geometrico e le curve tratte dal mondo vegetale. Il legame con la natura, tuttavia, non è puramente formale, anzi, si accompagna ad una attenta progettazione finalizzata a ridurre al massimo l'impatto ambientale.

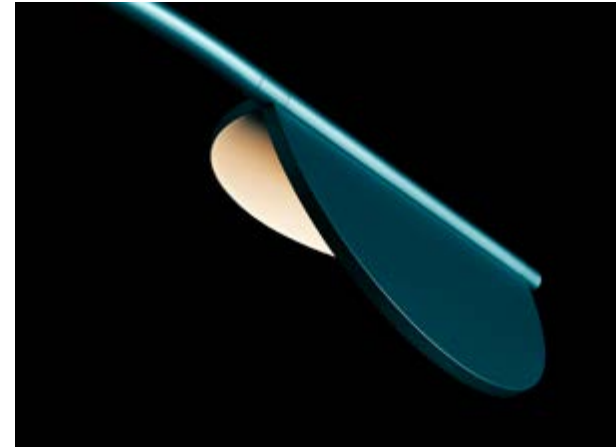

The inspiration for Almendra can immediately be seen in its silhouette, a perfect combination of geometric rigour and curves drawn from the world of plants. Its connection with nature, however, is not strictly formal. On the contrary, it underlies a careful design aimed at minimizing environmental impact.

I petali di Almendra, sia nella loro faccia opaca sia in quella trasparente, sono realizzati in uno speciale policarbonato che, anziché essere derivato dal petrolio, è derivato da un sottoprodotto della produzione della carta. Un materiale plastico sostenibile, proveniente da risorse rinnovabili, di origine naturale ma che tuttavia non consuma inutilmente terreno ed acqua con coltivazioni specifiche per la sua produzione.

Both the opaque and transparent faces of the petals are made of a special polycarbonate deriving from a by-product of paper production rather than from petroleum. It is, for example, great fun deliberately to confuse

Black Flag

Black Flag Pro

Black Flag di Konstantin Grcic è una lampada da parete estendibile che offre flessibilità di illuminazione grazie ai bracci in alluminio che si allungano fino a 3,5 metri a partire da una struttura a parete dello stesso materiale; un esercizio del modo in cui il minimalismo, unito alla tecnologia, può reinventare la funzionalità.

Black Flag is an extendable wall light that offers flexibility of illumination thanks to the expanding aluminium arm reaching up to 3.5 meters from a wall-mounted frame of the same material. Wall lamp and sculptural centrepiece, Black Flag embodies Grcic's industrial design expertise and demonstrates the experimental opportunities of his approach mixed with Flos' technical expertise.

SKYNEST CEILING

Skynest Ceiling by Marcel Wanders, 2023

Dal lancio di Bellhop Table nel 2017, il design di Barber & Osgerby si è evoluto dando vita a una famiglia di oggetti che si avventurano in diverse aree e funzioni dell'illuminazione. Da lampada compatta e ricaricabile, Bellhop è diventata un apparecchio di illuminazione da terra e una luce da esterno. Nella sua ultima versione, Bellhop si integra nell'architettura, appollaiandosi con tutto il suo colore sulla parete e spingendo la luce verso l'alto grazie alla nuova tecnologia ottica ad alte prestazioni di Flos. Il nuovo design mantiene la forma distintiva della lampada, con il paralume capovolto e declinato in una serie di ricche tonalità che ben si integrano con il suo design audace.

Since launching Bellhop Table in 2017, the design by Barber & Osgerby has evolved into a family of objects that branch out into different areas and lighting functions. From a compact rechargeable lamp, Bellhop has become a floor-standing uplighter and an outdoor light. Now in its latest iteration, Bellhop is integrated into the architecture, colourfully perching on the wall and pushing light upwards thanks to Flos' new, high performance optic technology. The new design maintains the lamp's distinctive shape, with the cap twisted upside down and declined in a series of rich hues that well complement its bold design.

COORDINATES

Michael Anastassiades, 2020

Coordinates è una collezione di luci dal forte impatto visivo, disegnate in origine da Michael Anastassiades per il leggendario ristorante Four Seasons di New York. Caratterizzata da barre di LED lineare saldamente intrecciate, la sua forma sembra ispirarsi alla precisione matematica di una griglia cartesiana, illuminata ed estesa in brillanti volumi tridimensionali.

A dramatic lighting collection originally designed by Michael Anastassiades for New York's legendary Four Seasons restaurant, Coordinates features a series of interlocking linear LED luminaires that take their formal inspiration from the mathematical precision of the Cartesian grid, illuminated and expanded to three brilliant dimensions.

Coordinates è composta da un corpo in alluminio estruso, dalla sofisticata finitura anodizzata color champagne, e da un diffusore bianco opale in silicone platinico. Rigorosa, elegante e facilmente adattabile, questa collezione rappresenta una soluzione flessibile e allo stesso tempo formalmente impeccabile per illuminare tante diverse tipologie di ambienti, regalando il massimo impatto scenografico con un minimo tocco magico.

Coordinates is made from extruded aluminium with a sophisticated anodised champagne finish, and an opal-white platinic silicone diffuser. Exact, elegant, and easily adaptable, this collection offers a flexible yet formally rigorous solution for a diverse range of indoor environments, providing maximum impact with a minimal touch.

In Flauta Riga, una serie di incisioni sapientemente calibrate sulla superficie tracciano un segno caratterizzato da puro rigore e riferimenti classici. L'accessorio deflettore, il cui colore si abbina al corpo della lampada, si può installare sulla testa superiore o inferiore. Fissato da magneti e viti di sicurezza, crea un effetto decorativo con la luce riflessa.

In Flauta Riga, a series of skillfully calibrated etchings on the surface trace a sign characterised by pure rigour and classical references. The deflector accessory, painted to match the lamp body, can be installed on either the upper or lower head. Held in place by magnets and safety screws, it creates a decorative effect with reflected light.

The wall fixing system that allows you

In alto: La Plus Belle è progettata per fornire il meglio della luce. Sotto il suo diffusore in silicone ottico si nascondono LED speciali assemblati in modo molto frequente per aumentare l'uniformità di diffusione e forniscono una performance unica grazie alla combinazione eccezionale di un indice di fedeltà cromatica (CRI) pari a 95 più un indicatore di stabilità dei rossi superiore a 90 (R9>90). Inoltre, la luce di La Plus Belle è gradevole e morbida (2700K) e gestibile dal dimmer a sensore integrato nello specchio.

A destra: La cornice di La Plus Belle è realizzata in una speciale lega di alluminio che consente di ottenere colorazioni anodiche di elevatissima qualità. Le finiture disponibili si dividono in anodizzato spazzolato (oro) o anodizzato lucidato (bronzo, alluminio naturale).

Top: La Plus Belle is designed to provide the best possible light. Special LEDS are hidden beneath the optical silicone diffuser, assembled in a very frequent mode to increase the uniformity of the diffusion and provide a unique performance thanks to the exceptional combination of a chromatic rendering index (CRI) of 95 plus a reds stability indicator of over 90 (R9>90). Furthermore, the light from La Plus Belle is pleasant and soft (2700K) as well as manageable by the dimmer with a sensor integrated in the mirror.

Right: The frame of La Plus Belle is made of a special aluminium alloy that provides the best possible extremely high quality anode colourations. The finishes available are brushed anodized (gold, copper) or polished anodized (bronze, natural aluminium).

265 & 265 SMALL

Paolo Rizzatto, 1973

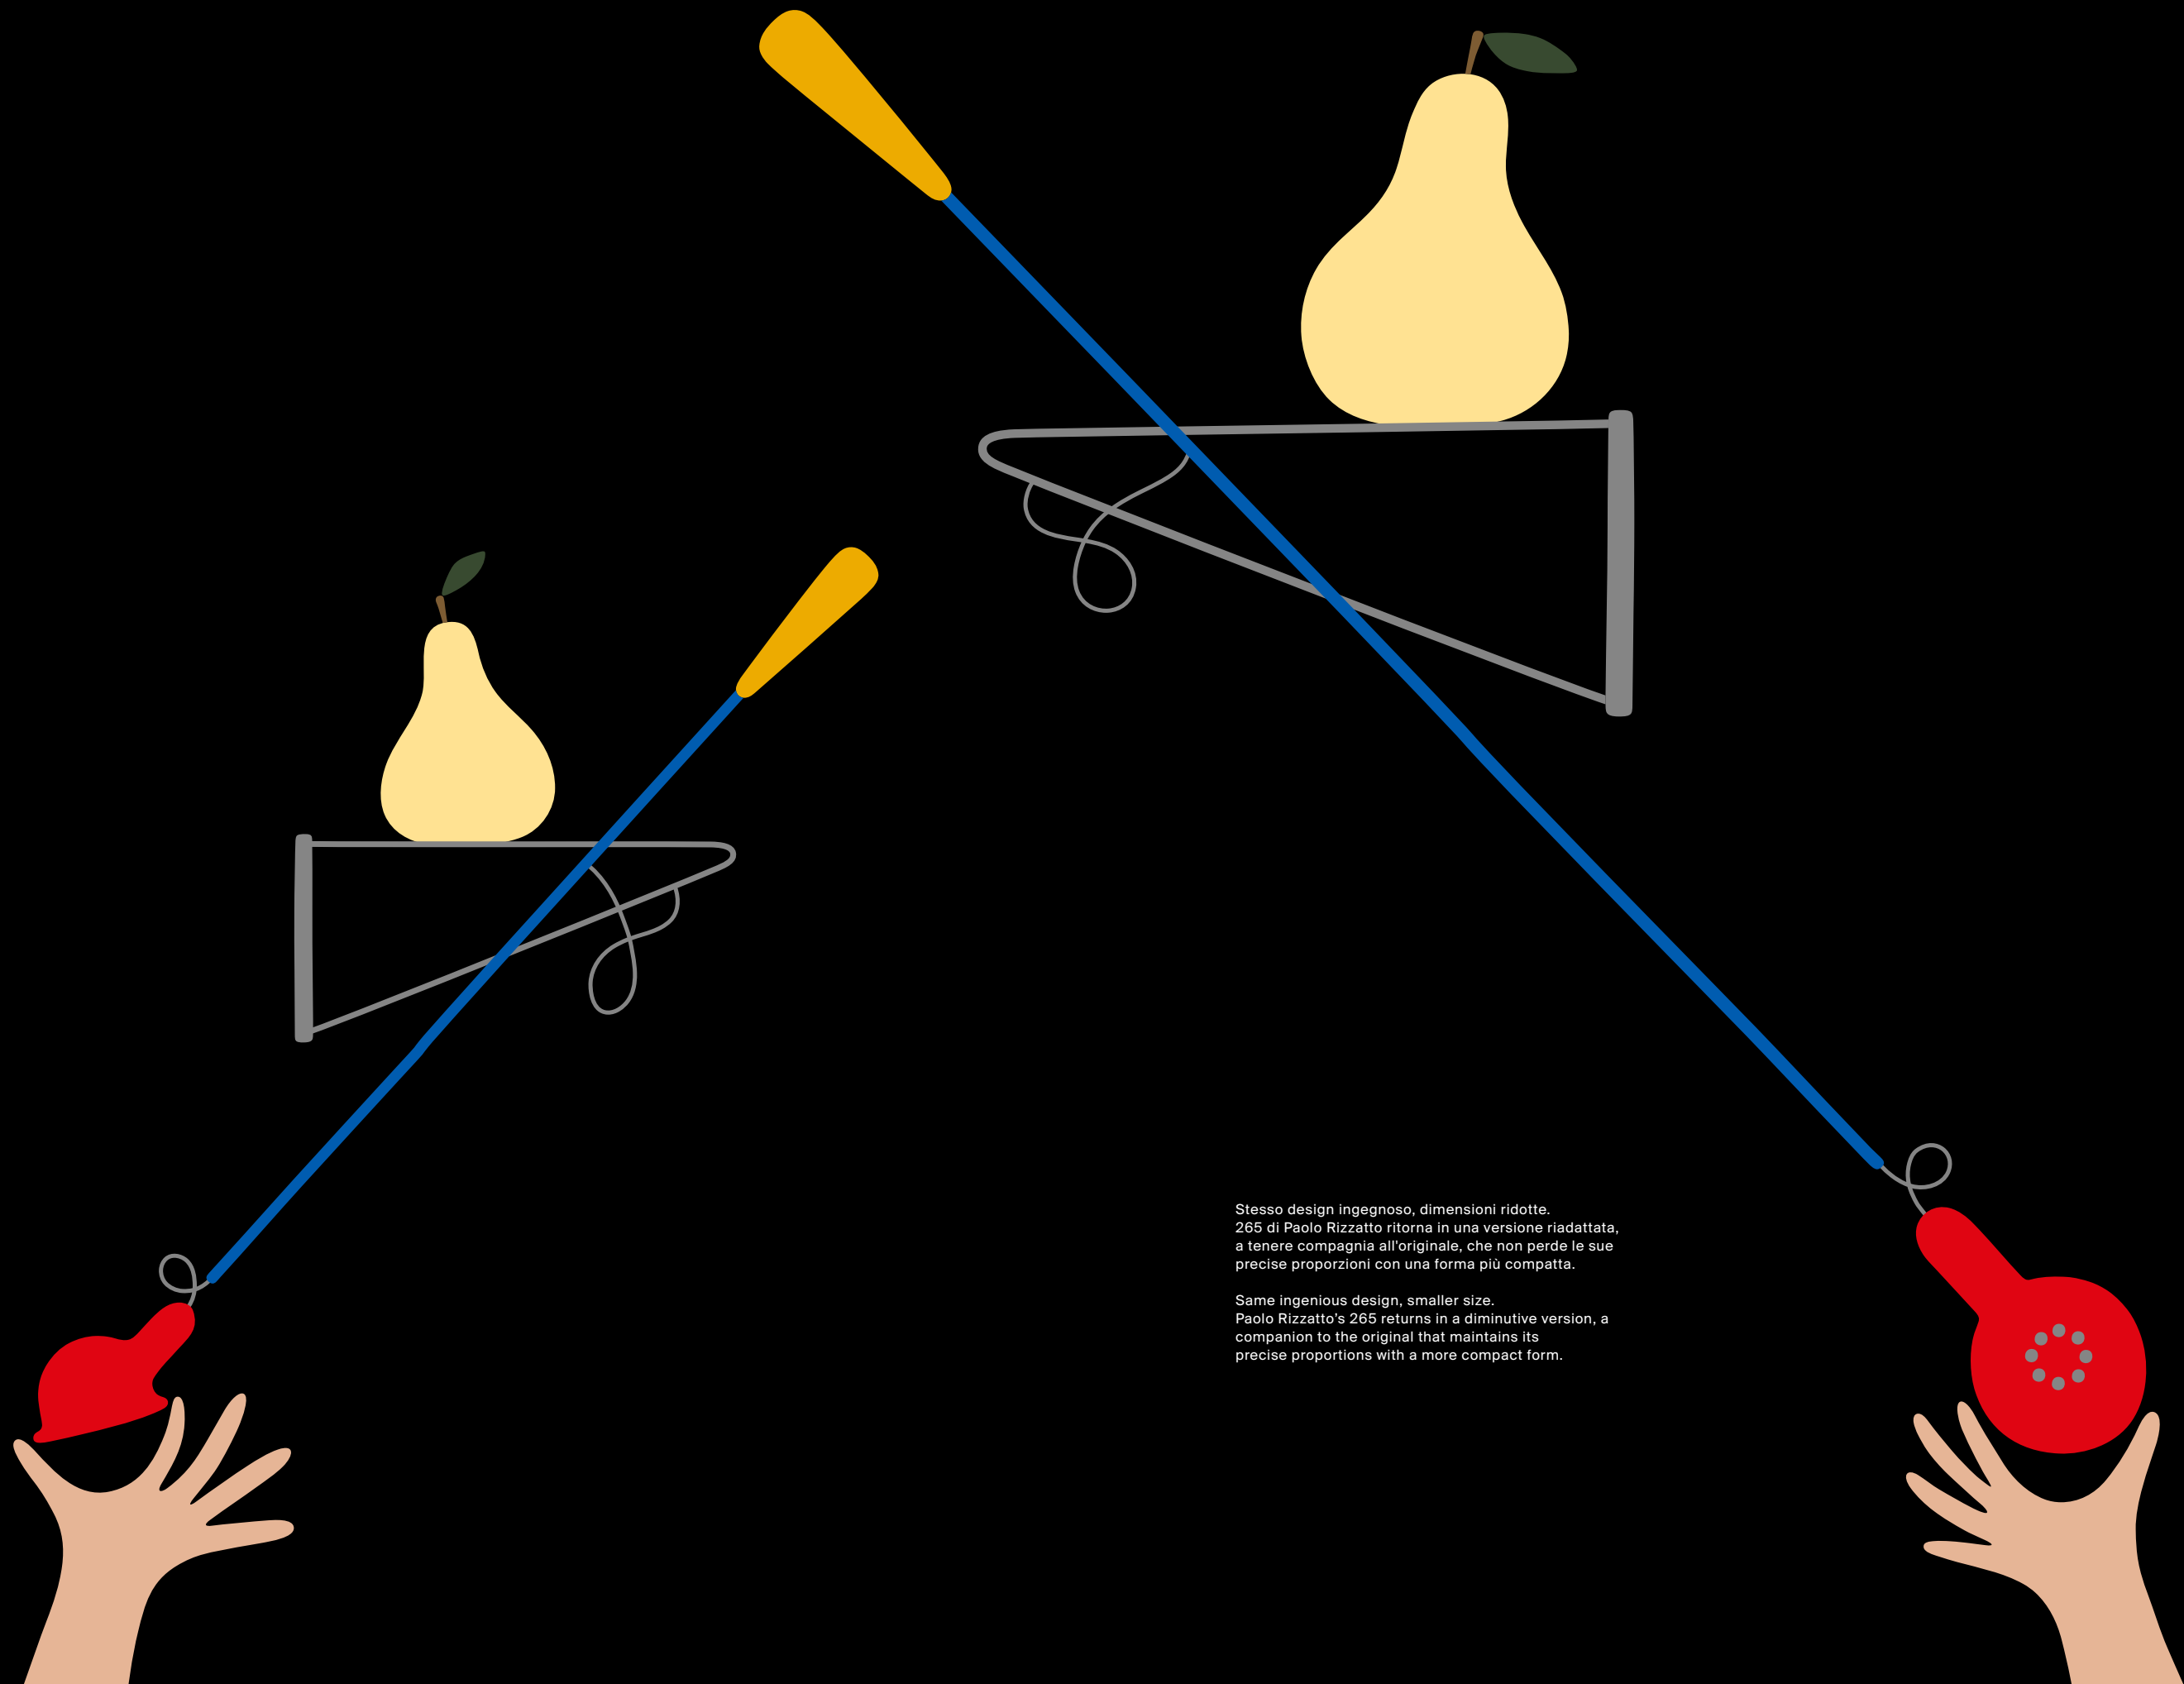

Il design della 265 di Rizzato è tanto semplice e intuitiva quanto tecnico e preciso: una lampada a parete da sospensione, costituita da un cappello e un peso, ciascuno in equilibrio alle estremità di un braccio regolabile e fissato a muro in una posizione asimmetrica. Nel progetto di Rizzato, ciascuna parte era caratterizzata da un colore primario scelto in modo specifico: il cappello, l'elemento più importante, era disegnato in rosso, il peso era giallo e il braccio di collegamento blu. La lampada fu poi prodotta in tonalità più tenui e sebbene sia normalmente disponibile in bianco e nero, la proposta cromatica originale di Rizzato ora sta facendo il suo ritorno nel catalogo Flos per celebrare l'idea originale dell'architetto.

The design of Rizzato's 265 is as simple and intuitive as it is technical and precise: a suspended wall lamp comprising a head and weight, each balanced at the extremities of an adjustable arm, and attached to the wall in an asymmetric position. In Rizzato's design, each part featured a specifically chosen primary colour: the head, the most important element, was drawn in red, the weight was yellow and the connecting arm, blue. The lamp was eventually produced in more muted shades, and while it is normally available in black and white, Rizzato's original colour proposal is now making its way onto the Flos catalogue to celebrate the architect's original thinking. The deflector accessory, painted to match the lamp body, can be installed on either the upper or lower head. Held in place by magnets and safety screws, it creates a decorative effect with reflected light.
